

Rules for the PARKOUR Reborn File

Problematic:

- Reuploads of our game that are public
- Reuploads of our game that intend to make ANY amount of money, even if private
- Reuploads of our game that are "private", but have a community of people who can access them - if we see more than 10 concurrent users, there is a problem!
- Dexxing the game - **with the intent of causing harm to us (taking away players, monetization, reputation, or leaking upcoming features)**
- Sharing dexxed files with the wider public, especially with the intent to cause harm
- Sharing knowledge gained from dexxing about features the public **doesn't** know about (example: gears, missions, cosmetics, etc.)
- Advertising modded games with the intent of whitelisting more members, even if privated on the website

Not a problem:

- Reuploads of our game that are private and have only a few friends who can access it
- Dexxing the game - **with the intent of learning from it or improving a private modded experience**
- Sharing dexxed files with a small group of friends without malicious intent
- Sharing knowledge gained from dexxing about features the public **does** know about (example: unreleased-but-known districts like the Mirror)
- Showing off modded games that use dexxed assets that are known about (for example, using dexxed Fragment billboards)
- Showing off features made in modded games (while clarifying that it is a modded game)
